The most serious as well as the most unprofitable investment for the market gardener is the sowing of spurious seeds.

Over Thirty Million Dollars worth of Garden Seeds are annually sold in this country, one-half of which are worthless either from old age or spurious stocks.

SEED FARMS: ROSEDALE, WATERFORD AND MORRISVILLE

Robert Buist Company

SEED GROWERS

STORES, 922 AND 924 MARKET STREET, Next to Post Office Philadelphia, Pa.

This is the 73rd Year for Buist's Garden Seeds.

PHILADELPHIA, January 1, 1901.
This Wholesale Catalogue is published exclusively for our Market Garden Trade, who requires seeds in much larger quantities than those who grow for their own requirements; the latter are reforced to Buist's Garden Guide for 1901 a very useful and valuable publication, which gives a monthby calendar of operations for the garden and other useful information for the Amateur. Our speciality is the growing of seeds from selected seed stock, the great importance of following this system for the production of choice vegetables is familiar to all gardeners; if the vegetables from which seeds are grown are inferior or impure, so will the product be.

loter Houist Com

Buist's Early Morning Star Pea.

THE EARLIEST PEA IN THE WORLD.

The Most Profitable Market Variety, Ready to Pick in 42 to 45 Days.

WE are the introducers of this CELEBRATED VARIETY, and put them up in Green Muslin Sacks of \(\frac{1}{4}\), \(\frac{1}{2}\), and I bushel, and Each Sack is fastened with our Lead Seal with the name of Buist stamped on it. Seed of this variety offered in any other way is Spurious stock.

WE SELL OVER 10,000 BUSHELS ANNUALLY.

Where EARLINESS, productiveness, large-sized pods and sweetness of flavor are desired, this it the variety to grow; it may be truly called the BLOODED STOCK of EXTRA EARLIES, and stands at the head of the list for the above fine qualities; in a favorable season they will be ready for market in 42

days, and the entire crop can be taken off in two pickings.

To the market gardener, earliness is of the greatest importance, as even a few days frequently makes a great difference in price, often a depreciation of from \$2.00 to \$4.00 per barrel; the inexperienced find this out when too late; therefore the EARLIEST is WHAT is REQUIRED, and the EARLY MORNING STAR is THAT variety. Sow them, you will make no mistake. We Annually grow 500 Acres of them. It was introduced by us in '87 and sold that year two thousand bushels, and each year the demand for them has annually increased; they have been the first Peas shipped North from the great pea growing districts of Florida, Louisiana, Mississippi and North Coroline, since '88 which can be readily attested to by the growers in these sections and in North Coroline, since '88 which can be readily attested to by the growers in these sections and in North Coroline, since '88 which can be readily attested to by the growers in these sections and in North North Carolina, since '88 which can be readily attested to by the growers in those sections, and in New Jersey and Long Island where thousands of acres of them are annually grown, they have attained the same reputation for both earliness and productiveness. Their growth ranges from two to two and a half feet, in accordance with the season, they are entirely free from runners and never require sticking; it is an easy variety to pick as almost a handful can be grasped at a time.

PLEASE OBSERVE that the true stock of the Morning Star can only be had through our

house or from the Merchants who handle our Seeds.

We insert this caution from the fact that a variety sold the past season by a Philadelphia firm under this name, proved to be nothing but an ordinary variety full of runners and ten days later than the genuine stock; its great popularity has caused a great demand for them.

Therefore in purchasing be sure you get them in our Green Muslin Sacks which are lead sealed by us, you will then be certain of securing the correct stock. Those offered under this name in any

other way are spurious.

Buist's Premier Extra Early Pea.

The Earliest, Most Productive and most Profitable Variety for Market (Excepting the Celebrated Buist's Morning Star.)

Before the introduction of the famous Morning Star, this was the earliest and most profitable variety known; and to-day requires no comment from us to recommend it, as it is grown more largely by the market gardeners of this country than any other brand of Extra Earlies, excepting the Buist's Morning Star. Its productiveness, earliness, eveness of ripening and great delicacy of flavor are its great features; these combined requisites makes it very profitable to grow for either market or private use; it is a week earlier than what is called "The First and Best" and of a much finer bred variety; producing pods of large size and entirely free from runners; it ripens uniformly and the entire crop can be taken off in two pickings. It is also one of the very best varieties for canning purposes. It is sold only under our seal.

TBUIST'ST

Lightning Early Valentine Beans.

THE BEST EARLY MARKET VARIETY.

(10 to 12 days earlier than any other Valentine.)
(Sold only in our Sealed Sacks.)

This recently introduced variety which has become famous in all the Bean-growing sections of our country, is well named, as it is lightning in ripening in comparison with any other stock of this popular Bean. The pods are large and round, is very productive, and when young entirely stringless. It cannot be recommended too highly to the market gardener, as he derives his greatest profit from the earliest crops, and this surpasses all other stocks of Valentines in both earliness and productiveness. It is sold only in our sealed packages and lead-sealed sacks.

Price—¼ bushel, \$1.75; ½ bushel, \$3.00; 1 bushel, \$5.50; 5 bushels, at \$5.25; 10 bushels, at \$5.00.

Improved Early Valentine Beans.

Price—¼ bushel, \$1.25; ½ bushel, \$2.25; 1 bushel, \$4.50; 5 bushels at \$4.25; 10 bushels at \$4.00.

DWARF BUTTER WAX BEAN, BISMARCK.

THE CREAM OF ALL THE WAX VARIETIES. (RUST-PROOF.)

This celebrated variety, which we introduced a few years since, is one of the most attractive and famous varieties of Wax Beans known in Germany; its great beauty, and extraordinary length of pods, attracted our attention in the markets of Berlin in '87; we found them in quality so far superior to any variety of the Wax that we had ever tasted that we secured sufficient for seed purposes for that year, and have since then grown them very extensively; they cannot be recommended too highly to all lovers of the Butter Bean. They are very early, the pods of which are produced in great profusion, and will average six inches in length, are almost transparent, exceedingly brittle and of very delicate flavor; the bean when dry is of a beautiful blueish black color and of a kidney shape. Price, ½ bushel, \$1.50; ½ bushel, \$3.00; 1 bushel, \$5.50.

DWARF SPECKLED KIDNEY WAX BEAN.

We regard this bean as one of the very best of the Wax varieties, even surpassing the famous Dwarf Golden or Cream Wax in both quality and productiveness, and is a grand market sort; the plants become literally loaded with long beautiful waxy colored pods, which are entirely stringless, and of a rich luscious flavor, it is also quite as early as the earliest stock of Valentines. The pods are very long, broad and flat, and are exceedingly brittle; beans, when dry, are white, with two shades of reddish purple, more or less visible, of a distinct kidney shape. We cannot recommend it too highly for either market or family use. Price, ½ bushel, \$1.75; 1 bushel, \$6.00; 5 bushels, at \$5.75; 10 bushels at \$5.50.

BUIST'S PERFECTION EARLY WHITE SPINE CUCUMBER.

THE MARKET GARDENERS first and most important consideration in growing Cucumbers for market is to obtain the choicest seed stock for planting. Most of the crops grown are very much mixed and of inferior quality. Buist's Perfection is regarded by growers as the finest and purest stock known. It is not only the earliest, but it produces cucumbers of the finest form and most salable size for shipping purposes. It was introduced by us a few years since, and is already being grown by the most extensive cucumber cultivators in this country. We annually grow especially for seed, over 150 acres; it is

THE GREAT MARKET GARDEN VARIETY

which is put up in our Sealed $\frac{1}{4}$, $\frac{1}{2}$ and 1 pound Cartoons only; we sell it no other way. It has become the most popular and salable stock of White Spine Cucumber Seed in this country. Seed sold for this variety in any other way than in our Sealed Cartoons is Spurious. Price, $\frac{1}{4}$ lb., 30 cts.; per lb., \$1.00; 5 lbs. at 90 cts.; 10 lbs., 75 cts., 25 lbs. at 65 cts. per lb.

EARLY JERSEY WAKEFIELD CABBAGE.

(BUIST'S SELECTED STRAIN. Its Great Features are Its Size and Earliness.)

Each year this variety is becoming more popular and demand greater. It has not been very long since ite growth was confined almost exclusively to the market gardeners of New Jersey, but it has gradually disseminated into other sections, and now is well known and highly appreciated by all the leading market gardeners of this country. We regard it as one of the best and most profitable early varieties, for either market or private gardener, it is always sure to form fine solid heads, and is the largest heading of the early varieties; the strain of seed which we offer is regarded by the most extensive cabbage growers as the best in this country. Price, oz. 25 cts.; ¼ lb. \$\mathscr{L}\$ cts; lb. \$2.75; 5 lbs. at \$2.50.

THE CHARLESTON, OR LARGE JERSEY WAKEFIELD CABBAGE.

This famous variety differs only from the Early Jersey Wakefield in its earliness and size of its heads, which are twice as large and only a week later. As a second early market variety it is very valuable and unsurpassed. Price per oz. 25 cts.; 4 oz. 65 cts.; lb. \$2.25; 5 lb. at \$2.00.

HENDERSON'S EARLY-SUMMER CABBAGE.

This is also a very popular and profitable variety for the market gardener, as its heading scason is between the Large Jersey Wakefield and Early Drumhead, producing heads of double the size of the former and almost equal to the latter, frequently weighing from 12 to 20 pounds each; of round, flattened form, very compact and solid and of excellent quality. Its leaves turns into heads almost as soon as formed, which permits of close planting. Price per oz, 20 cts.; 4 oz., 60 cts.; 1 lb, \$1.85; 5 lbs. at \$1.75.

BUIST'S Celebrated Florida Header Cabbage.

THE GREAT CABBAGE FOR FLORIDA AND LOUISIANA.

This variety which we introduced, requires no further endorsement by us as it has become famous not only in Florida and Louisiana, but throughout the entire country, and has taken the front rank for its certainty of heading and fine market qualities; we have not yet been able to grow sufficient seed to supply the great demand for it; in Florida, Louisiana and other extreme sections of the South, where so much trouble and disappointment frequently occurs in heading cabbage, it has proved a universal favorite, and growers in those sections appear to be wild in its praise and recommendations, and state they have never had any variety to equal it, scarcely a single failure can be found in whole fields, and the heads average from 15 to 30 pounds each; we therefore named it the Florida Header. It is now being grown by almost every Cabbage grower in the South. In the Western States which are more favorable for the growth and heading of Cabbage than the South, it has proved equally as successful, and forms heads of a much larger size; it is much earlier than the Drumhead or Flat Dutch, and on account of its not being so rank in growth can be planted much closer together, therefore producing more heads to the acre. As a variety for market, shipping or private gardens it has no equal.

This seed is put up and sold only under our Seal, and can be obtained only from our House.

Price, oz. 25 cts.; ¼ lb., 85 cts.; lb., \$2,75; 2 lbs., at \$2.50.

HENDERSONS SUCCESSION CABBAGE.

This is one of the most valuable varieties ever introduced and one that has become very popular with all market gardeners'—in fact no gardener can afford to be without it, whether he grows for market or for private use. It is a second early variety following the Early Summer in heading, but forming heads of a much larger size and of a greater uniformity. On Long Island where we annually grow over one hundred and fitty acres in cabbage seed this variety has attracted great attention, as it shows the very finest breeding. In whole fields almost every head appears to be moulded from the same model. It can be grown successfully either as an early, medium or a late trop, and under any circumstances it is not liable to shoot to seed until after it forms its fine solid Price, per oz., 20 c's.: 4 oz., 60 cts.; 1 lp., \$2.00; 5 lps. ... \$185.

THE GREAT CABBAGE

Buist's Improved Drumhead Cabbage, (SEALED.)

THE GREAT PRIZE MEDAL STOCK.

AWARDED 22 PREMIUMS IN ONE YEAR.

Will produce Large Solid Heads in any country and in any soil. The richer the soil, the finer the heads.

When it is generally admitted that the product of over one-half of the cabbage seed sold in this country never heads, and that which even grows is of very inferior quality, there is no wonder that a variety which heads as sure as the sun rises has become so celebrated throughout the entire country—this variety is known as Buist's Improved Drumhead, as illustrated above. For over 25 years we have been the most extensive growers of Cabbage Seed in this country, and during that time we have made the selections and improvement of our Seed a special study; each year the finest heads from our growing crops are selected and planted out especially to seed the following season, the centre seed stocks of which are only allowed to produce seed. This continued improvement, for so long a period, has produced a stock of Drumhead Cabbage that has no equal for its compact growth, short stem, and for its large and beautiful heads; letters are annually received from every section of our country speaking its praise. In the Eastern and Western States the heads will attain from 25 to 60 pounds, and in the South from 15 to 30 pounds each. Seed

sown in April will head in July and August; sown in May will head in October. Per oz., 30 cts.; ¼ lb., \$1.00; lb., \$3.00; 2 lbs., at \$2.75.

Buist's Improved Large Thornless Purple Egg Plant.

This is an improvement in earliness, productiveness and size of fruit over the ordinary large purple variety, or what is known as the New York Purple; it is of a very dark rich color and of beautiful form. It is also the most salable and attractive variety for market and the most profitable to grow because more productive. We annually grow 25 acres of this variety especially for seed. Per oz. 35 cts.; ¼ lb., \$1.00; lb., \$3 75.; 2 lbs., at \$3.50.

NEW YORK IMPROVED PURPLE,

This is grown very largely by the mar! It gardeners of New York; it is of a large oval shape, with smooth stems, quite productive and of good size. Per oz., 30 cts.; 1/4 lb., 90 cts.; 1b., \$3.00.

BUIST'S SELECTED SHORT-STEM BRUNSWICK DRUMHEAD CABBAGE.

(The Seed of this Variety is Sold only under our Seal.)

The Great Demand for it requires us to protect Ourselves and Customers in this manner. Seed offered in any other way is Spurious.

The true Short-Stem Brunswick Drumhead Cabbage has been for many years a general favorite with the market gardeners and cabbage growers located in Louisiana, Florida and other tropical sections of this country, not only for its being especially adapted to their climate and great certainty in heading, but also for the size and superior quality of the cabbage; but, unfortunately, a very large percentage of the seed sent out and sold under the name of Brunswick is either spurious stock or so much mixed with other varieties as to be almost valueless to the gardener; for this reason we have introduced what is known as the

BUIST'S SELECTED SHORT-STEM BRUNSWICK DRUMHEAD.

For the past few years we have paid special attention to the improvement and selection of this valuable variety and the seed which we offer will be found superior to any in the world; it is perfection in growth, habit, and in the formation of its heads, which are much larger, more compact and closer grain than the old Brunswick; market gardeners who have grown this stock pronounce it the finest they have ever had. It is put up and sold only in our sealed packets, ounces, quarters, halves and pounds, and can only be had from our house or from the merchants who handle our seeds. Per oz., 25 cts.; 4 oz., 75 cts.; 1b. \$2.75; 5 lbs. at \$2.50.

BUIST'S HALF-LONG OR SCARLET INTERMEDIATE CARROT. (Pointed-Root.)

This is undoubtedly the best and most salable variety for market, it is very productive, producing large and handsome roots of perfect form, and of a beautiful orange red color. Per oz., 10

ets.; 1/4 lb., 25 cts.; lb., 70 cts.; 5 lbs. at 65 cts.

BUIST'S SELECTED SEED POTATOES.

The Buist Brand of Seed Potatoes has an established reputation throughout the country for their Great Purity, Fine Quality and Productiveness. They are packed in large barrels containing 23/4 bushels (165 lbs).

They are grown in Vermont, Nova Scotia and Frince Edward's Island especially for seed, and are of an entirely different quality from the stocks generally sold, which are frequently mixed varieties of a very inferior grade, with the names branded on the barrels to suit the order. For a list of varieties see our Garden Guide.

PRICE: Per Barrel, \$3.25; 10 Barrels at \$3.15; 25 Barrels at \$3.00.

922 and 924 Market St.
Next to Post Office.

Robert Buist Company,

Seed Farms: Rosedale, Waterford and Morrisville.

PHILADELPHIA.
